Explosives even being hidden behind of barriers, metal structures, brick walls, concrete structures can be easily found by Sniffex. Since Sniffex has a sensor which is very sensitive to the ions of NOx which is always exist in all explosives. As a result, Sniffex finds all explosives that have NOx such as TNT, C4, Pentarythrol Tetranitrate PETN, Royal Demolition Explosive-RDX, dynamite etc.

**SNIFF<sup>EX</sup>®**

It starts to work with the hands' movements of the operator. Its working range is between 8 and 12 meters for small targets. Its weight is changing from 50gr to 200gr. For more heavy targets which is about 400 gr, its range is 50 meters

**SNIFF<sup>EX</sup>®**

For any security gate control points, sniffex helps to find explosives and any guns or weapons.

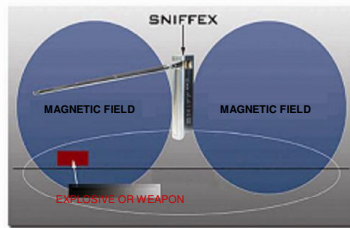

**SNIFF<sup>EX</sup>®**

Sniffex can be used to find hidden guns and explosive material which are trucked away in any parts of freight transport vehicles

**SNIFF<sup>EX</sup>®**

It can be detect not only personal mines but also anti-tank mines. The remote controlled bombs can be easily found by this system. This is preventing terrorist attack to the people and soldiers.
